

Avaya 4624 IP Telephone

The 4624 is an IP telephone with 24 programmable line and feature buttons, a two line LCD display and a full duplex speakerphone. The display informs the user of date, time, call timer, calling party information and access to state dependent user features. Feature and line appearance buttons have a red and a green LED associated with each to indicate line states and feature status. The 4624 works with the DEFINITY® and IP600 Communication Servers, part of the Enterprise Class IP Solutions (ECLIPS) portfolio.

Features

- 24 programmable feature buttons — programmed for line appearances or features
- 8 fixed feature buttons — Speaker, Mute, Hold, Transfer, Conference, Redial, Volume Up & Down
